

DACK Consulting Solutions, Inc.

Marketing & Proposal Management Platform

Developer Scope Document – Revised

Preferred System: Desktop or Hybrid Application

Web-based deployment is not required. The platform must integrate natively with Adobe PDF, Adobe Acrobat, InDesign, Bluebeam, Microsoft Word, and Excel.

1. Platform Overview

A centralized, integrated platform purpose-built for DACK's proposal development, marketing operations, and project tracking needs.

The DACK Marketing & Proposal Management Platform is designed to eliminate manual processing, standardize content, and accelerate proposal delivery. It consolidates all marketing and proposal operations into a single, permission-controlled environment that integrates directly with DACK's existing Adobe and Microsoft Office workflows.

Key objectives include:

- Reduce manual effort across the proposal lifecycle through automation.
- Centralize all proposal, resume, rate, and project content in one platform.
- Provide real-time intelligence on RFPs, staffing, and agency requirements.
- Track performance metrics including proposal success rates and awarded values.
- Support multi-user collaboration with role-based access control.

Module Summary

Module	Key Capabilities
Document Control	Repository, version control, permissions, subconsultant tracking
RFP Analysis	Upload & parse RFPs, generate go/no-go dashboard, checklist automation
Proposal Generation	AI-assisted drafting, drag-and-drop builder, export to Word/PDF
Project Sheet Generator	Standardized templates, auto-population, PDF export
Content Library	Tagged boilerplate content, searchable and insertable
Template Management	Admin-controlled proposal, resume, and project templates

Resume Library	Multi-version storage, role/cert search, proposal integration
Certifications Library	Expiration tracking, staff profile links, alerts
Staffing Builder	Drag-and-drop team assembly, subconsultant tracking
Rate Tracking & Pricing	Multi-rate per employee, multiplier automation, rate sheet export
Workload & Project Mgmt	Auto-generated workload forms, dashboard, staffing alerts
Agency & Teaming Intel	Institutional notes, teaming history, proposal strategy integration
Marketing Module	Budget tracking, inventory alerts, receipt storage, website analysis

2. Document Control Module

A centralized, searchable repository for all proposal-related documents with version control and permission management.

- Repository for RFPs, proposals, resumes, and project sheets.
- Version control with full revision history and audit trail.
- Searchable by keyword, agency, client, and project type.
- Role-based user permissions: Admin, Edit, and View access levels.
- Rate control integration — manage and restrict access to proposal rate data.
- Subconsultant document management — track and organize work submitted to agencies and clients.

3. RFP Analysis Module

Automated RFP ingestion and analysis to accelerate go/no-go decisions and streamline submission preparation.

- Upload RFPs in PDF or Word format.
- Auto-extract scope of work, requirements, deadlines, and evaluation criteria.
- Generate a summary dashboard with go/no-go insights and firm win-rate context.
- Suggest historical proposals to use as a starting template.
- Recommend resume candidates with analysis of strengths and weaknesses relative to RFP requirements.
- Propose candidate teams based on billing rate alignment and resume match scores.
- Suggest relevant project sheets (see Section 5).
- Identify all forms required for RFP submission.
- Auto-generate a submission checklist.

4. Proposal Generation Module

A structured, AI-assisted proposal builder with preloaded templates and full export capability.

- Preloaded section templates for all standard proposal components.

- AI-assisted content drafting — generates responses aligned to RFP language.
- Drag-and-drop proposal builder for flexible section ordering and content assembly.
- Export finalized proposals to Microsoft Word and PDF.

5. Project Sheet Generator

Standardized, auto-populated project sheets ready for proposal insertion and PDF export.

- Standardized template applied consistently across all project sheet entries.
- Auto-populate fields from uploaded project data, including logos, descriptions, and project details.
- Export individual or batch project sheets to PDF.

6. Content Library

A centralized repository for reusable proposal content, tagged for precise, fast retrieval.

- Central repository for boilerplate text, standard language, and reusable content blocks.
- Tagged by: agency, service type, project type, project size, project cost, and assigned personnel.
- Full-text search with one-click insertion directly into the active proposal.

7. Template Management

Admin-controlled template library for proposals, resumes, and project sheets.

- Manage and maintain templates for proposals, resumes, and project sheets from a single interface.
- Admin-controlled formatting ensures brand consistency and compliance with submission standards.
- Version tracking — preserve historical templates and roll back as needed.

8. Resume Library

A multi-version staff resume repository integrated with proposal assembly and folder management.

- Store multiple resume versions per staff member (e.g., abbreviated, full, agency-specific).
- Automatically file resumes used in submitted proposals into the corresponding employee's folder.
- Search by role, years of experience, and certifications.
- Insert directly into proposals and export as needed.

9. Certifications Library

A tracked certifications database linked to staff profiles with expiration alerts.

- Central database for all staff certifications, licenses, and credentials.

- Linked directly to individual staff profiles.
- Track expiration dates and surface pop-up alerts at login to prompt timely renewals.
- Filter and search staff by active certification status.

10. Staffing Builder

Drag-and-drop team assembly with subconsultant tracking and team performance analytics.

- Assemble proposal teams using a drag-and-drop interface.
- Auto-generate team bios and staffing tables for proposal insertion.
- Save and reuse team configurations for repeat agency or project-type pursuits.
- Track subconsultant participation and monitor award success rates by project type and agency.

11. Proposal Workflow

An end-to-end automated workflow that guides users from RFP receipt through final export.

Step	Action	Description
1	Upload RFP	Import PDF or Word RFP document into the system
2	RFP Analysis	Extract scope, requirements, deadlines, and evaluation criteria
3	Go / No-Go Insight	System generates dashboard with win-rate and firm strengths/weaknesses
4	Suggest TOC	AI recommends table of contents based on RFP requirements
5	Generate Checklist	Auto-generate submission checklist and required forms
6	Pull Required Forms	Identify and list all forms needed for submittal and award
7	Select Staff & Projects	System suggests resumes and project sheets matched to RFP criteria
8	Flag Gaps	Highlight missing information and recommend additions for relevance
9	Generate Draft	AI-assisted proposal draft with template pre-population
10	Review & Edit	User edits content; system tracks changes by user
11	Export	Final export to Word and/or PDF for submission

12. Rate Tracking & Proposal Pricing Module

A centralized rate database with automated multiplier calculations and agency-specific rate sheet generation.

The platform maintains a comprehensive personnel billing rate database that supports multiple rates per employee across agencies, clients, and contract types. Loaded rates are calculated automatically using configurable multipliers.

Rate Tracking Fields

Rate Field	Description
Employee Name	Full legal name of personnel
Title	Applicable project title (multiple titles supported per employee)
Agency / Client	Target agency or client for the rate
Prime / Sub Relationship	Whether DACK is prime consultant or subconsultant
Contract Type	Contract classification or vehicle
Bare Rate	Base hourly billing rate before multipliers
Loaded Rate	Fully burdened rate (bare rate × multiplier)
Home Office Multiplier	Applicable multiplier for home office billing
Field Office Multiplier	Applicable multiplier for field office billing
Effective Date	Date rate becomes active
Expiration Date	Date rate expires; triggers annual flag
Notes / Exceptions	Contract-specific exceptions or override conditions

Functional Capabilities

- Automatically calculate loaded rates using configurable agency and office-type multipliers.
- Support multiple titles and rates per employee (e.g., Project Manager and Senior Project Manager).
- Maintain distinct rates for the same employee across different agencies or primes.
- Track historical rate changes with full revision history.
- Flag outdated or expired rates annually.
- Restrict access to rate data through user permission controls.

Rate Sheet Generation

During proposal generation, the system identifies the relevant agency and contract, pulls the appropriate personnel rates, and produces a formatted rate sheet automatically. Multipliers may appear below the table or be incorporated directly into fully loaded rates.

Example Rate Sheet Output:

Personnel	Title	Bare Rate	Loaded Rate
-----------	-------	-----------	-------------

AJ	Senior Project Manager	\$82.50	\$181.50
----	------------------------	---------	----------

Multiplier Calculation: DASNY Home Office Multiplier 2.2 — Loaded Rate = $\$82.50 \times 2.2 = \181.50

Export Options

- Export rate sheets to Excel, Word, and PDF formats.
- Generate agency-specific rate sheets on demand during proposal preparation.

13. Workload & Project Assignment Management Module

Automated workload form generation and centralized project tracking from award through completion.

The system automatically generates a Workload Form whenever DACK is awarded a contract or assigned work as a subconsultant. All workload records remain editable throughout the project lifecycle.

Workload Form Fields

Field	Description
Project Name	Full project title as listed in the contract
Project Type	Classification of work (e.g., Estimating, CM, Inspection)
Agency / Client	Awarding agency or client entity
Contract Status	Active, Pending, On-Hold, or Completed
Project Start Date	Contracted or anticipated start date
Anticipated Completion Date	Expected project closeout date; triggers alerts
Department Responsible	Internal department leading the scope of services
Department Head	Name of department lead or supervisor
Assigned Personnel	Staff members assigned to the project
Personnel Role	Specific role of each assigned team member
Workload Status	Current staffing and workload classification
Notes / Project Updates	Running log of project milestones or changes

Functional Capabilities

- Track workload distribution across departments, employees, agencies, project types, and durations.
- Allow reassignment, addition, or removal of personnel at any point in the project lifecycle.
- Link workload records to corresponding proposals, resumes, project sheets, and staffing records.
- Generate workload dashboards and staffing utilization reports.

System Alerts:

- Approaching completion dates.
- Staffing conflicts and overlapping assignments.
- Inactive projects requiring status updates.

Example Workload Record

Field	Value
Project	DASNY John Jay College HVAC Renovation
Project Type	Estimating
Department	Estimating Department
Department Head	Kim
Assigned Personnel	Jose
Start Date	June 1, 2026
Anticipated Completion	September 15, 2026

14. Agency, Client & Teaming Intelligence Module

An internal knowledge base that surfaces institutional memory during proposal preparation and RFP analysis.

This module provides a searchable, permission-controlled database of institutional knowledge tied to specific agencies, clients, prime consultants, subconsultants, and contract types. Notes are surfaced automatically during proposal generation, staffing selection, and RFP analysis.

Functional Capabilities

- Store and retrieve internal operational notes and lessons learned by agency, firm, project type, and personnel.
- Flag important proposal requirements and recurring agency-specific preferences.
- Track historical teaming performance with consultants and subconsultants, including contract award outcomes.
- Surface relevant notes automatically during proposal generation, staffing, rate generation, and RFP analysis.
- Allow tagging of notes as: Operational, Proposal-Related, Compliance, Staffing, or Financial.
- Administrator review and approval required for sensitive or restricted notes.

Example — Agency Intelligence (DDC)

- DDC frequently requests payroll verification or paystubs to validate submitted billing rates.
- For scheduling services, a designated staff member is typically submitted to support higher billing classifications.

- DACK does not provide estimating services as a subconsultant to DDC in order to avoid conflicts with future construction management pursuits.

Example — Teaming / Consultant Intelligence (W. Allen)

- Generally responsive in providing required deliverables.
- Personnel quality has historically been inconsistent across assignments.

15. Marketing Module

A marketing operations hub for budget control, materials tracking, inventory management, and website strategy.

Materials & Budget Tracking

- Track all marketing materials purchased, including date, vendor, frequency, and price.
- Maintain a running budget with pop-up alerts when approaching monthly spending limits.
- Store and organize receipts linked to individual purchase records.
- Display materials tracking in a sortable chart organized by vendor and order history.

Inventory Management

- Track current inventory levels for all marketing materials.
- Pop-up alert triggered when inventory falls below defined threshold levels.

Website Strategy & Analysis

- Run automated website content analysis and surface recommendations for projects to upload.
- Advise on how to leverage website content when developing proposal marketing strategy.

16. Technical Requirements

System architecture, integration, and performance specifications.

Requirement	Detail
Platform	Desktop or hybrid application (web-based not required)
Multi-User Access	Role-based permissions: Admin, Edit, View
Data Storage	Centralized server or shared drive
File Integrations	Adobe PDF, Acrobat, InDesign, Bluebeam, MS Word, Excel
Performance	Optimized for large files and multi-user concurrent access
Audit Trail	Track changes to proposal folders and content by user

Analytics	Proposal success rates and dollar amounts proposed vs. awarded
Security	Permission-restricted access to sensitive rates and internal notes
Alerts	Budget limits, inventory levels, certification expirations, deadlines
Export Formats	PDF, Word (.docx), Excel (.xlsx)

17. Development Phasing

A four-phase delivery roadmap prioritizing core functionality first and advanced intelligence in subsequent releases.

Phase	Focus Area	Deliverables
Phase 1	Core Foundation	Document control, proposal builder, resume library, project sheets
Phase 2	AI & RFP Intelligence	RFP analysis engine, AI-assisted drafting, go/no-go insights
Phase 3	Analytics & Automation	Advanced reporting, success rate tracking, workflow automation
Phase 4	Marketing Controls	Inventory management, budget tracking, website analysis tools
